TECHNICAL PROPOSAL

COMPANY INTRODUCTION

Shanghai Tiran is a commercial and industrial company dedicated to providing the most modern, efficient and solid solutions in machinery and production processes in the field of nonwovens.

The knowledge and experience, acquired for more than 10 years, in the construction and start-up of complete production lines guarantee our quality, for that we have a highly qualified technical team, capable of responding and solving the most demanding challenges .

Shanghai Tiran strengthens the vision of becoming a key partner for our clients in finding effective, energy efficient, sustainable and technologically advanced production solutions to meet the highest requirements and standards.

On behalf of our technical and commercial staff and especially our Management, we want to thank you for the opportunity to send you the following commercial proposal:

PROJECT INTRODUCTION

In this project, we want to bring you the most advanced solution in full perforating synthetic leather.

Our mechanically leather perforating machine, uses bent axle revolving to achieve loop movement and punching the holes with the desired pattern on different materials as: leather, cloth, paper, foam, thin metal, PVC and other thin films.

TECHNICAL PROPOSAL**MAIN SPECIFICATION:**

1. Effective working width : 1600mm (tolerance within 1mm)
2. Production speed : 2 – 8 m/min
3. The biggest diameter of paper : 1400 mm
4. Paper shelf cylinder diameter :80 mm

ELECTRIC AND MECHANIC SPECIFICATION:

1. Supply and Voltage : 380V – 50/60Hz.
2. Rated Power : 18 KW
3. Height of molds : 25mm
4. Ram pressure : 120 ton
5. Air pressure : 6 kg/cm²
6. Weight : 8500 Kg
7. Perforating Machine size : 3220*1950*2000mm
8. Feeding shelf size : 1950*1850*1450mm
9. Rewinding shelf size : 2350*1850*1150mm
10. Electric box size :850*500*1250mm

TECHNICAL PROPOSAL**MAIN SPECIFICATION:**

- a) The leather punching machine can punch and emboss as well by warming the mold.
- b) Large variety of patterns as different forms, structure, dispersion and combination between punching and embossing.
- c) Flower patterns and fantasy forms are available.

Advanced numerically-controlled technology and software-controlled technology.

- a) Numerically controlled technology is the core of advanced manufacturing technology and develops towards high-speed, high-precision, multi-function, intelligent systematization and high reliability
- b) For electrical technology of punching machine, our leather punching machine applies high-speed SOC single chip, and achieves real-time control.
- c) For software technology, The Leather Pinching machine applies Man-machine interface, simple operating and reliable running.

Mechanical features

- a) Drawing-back treatment of punching machine
- b) The spindle of punching machine applies 10m big lathe and host machine is formed by planer type milling machine
- c) Leather punching machine weight is 8,5Ton that can assure the stability and high precision of the whole system.
- d) Rewinding of leather punching machine applies magnetic powder separation and reunion that assures the accuracy and tidiness of rewinding.
- e) The pillow of leather punching machine applies cooper bush structure of high-speed punching that assures accuracy, high resistance and efficient lubrication.
- f) Leather punching machine applies recycling cooling oil to sure the lubrication bring down the temperature

TECHNICAL PROPOSAL**COMMERCIAL PROPOSSAL****PROJECT: LEATHER PERFORATING MACHINE****OFFERED PRICE: 42,500 U\$D**

Us Dollar say: Forty-two thousand five hundred.-

SHIPPING CONDITIONS: FOB CHINA SEA PORT

Wooden packing and land freight to the seaport costs are included.

PAYMENT TERMS:

30% Down payment with order

70% by Irrevocable and confirmed Letter of Credit at sight or Bank TT before shipping

VALIDITY OF THE OFFER

30 days

DELLIVERY TIME:

45 Days

WARRANTY PERIOD:

12 MONTHS FROM ARRIVING DATE.

We appreciate your confidence very much, and we can ensure you that you will not fail at all by choosing our company, to carry this big and complex program to the success

Best regards.
